

## Wedge Fitting

**\$90**

**The goal of Wedge Fitting is to provide you with the best combination of wedges to optimize your short game performance (scoring) and yardage gaps.**

Your Fitting Professional will first evaluate the lofts and carry distances for the wedges in your bag. He'll then fit you for a sand wedge loft, bounce angle, lie and spin. He'll have you hit shots from firm turf conditions to verify the bounce recommendation, while fitting for lie and spin.

You'll hit a full pitching wedge as well as a full shot sand wedge to determine the gap between the two carry distances. If that gap is more than 15 yards, a gap wedge may be recommended.

*A Driver/Digger type wedge player has a steep angle of attack and will need more bounce and a wider sole. A Slider/Sweeper type wedge player comes into the ball at a shallower angle and will need less bounce and a narrower sole.*

### FITTING REMINDERS

- Your Wedge Fitting will last 45-60 minutes
- Bring your own irons and wedges to the fitting session

*Titleist / Cobra / Callaway / Ping / Taylor Made*
