

Scheyden Revelry Composite Hybrid Sunglasses \$259-\$309

Designed as a smaller version of the extremely popular Revelstoke model, the Revelry Composite Hybrid fuses a cedar-rolled composite frame with flexible, hypoallergenic NIAG temples and olefin tips for complete comfort, even when wearing a hat, headphones or a headset. The full-coverage frames can be fitted with either glass or CR-39 lenses, which are created using Scheyden's technologically advanced multi-layer process. Hand-ground and polished, they feature a hydrophobic coating to repel water and perspiration, and several layers of magnesium hexafluoride to diffuse ambient light and protect pupils from harsh reflections. The distortion-free lenses also include a scratch-resistant finish and optional polarization.

KZG X95 Wedge \$109

The KZG X95 wedge is designed specifically for the mid-to-high handicap player. The head is constructed from KZG's heat-treated proprietary steel alloy, giving it a "feel of forged" not typically found in cast clubs. KZG's proprietary alloy enables easy lie and loft adjustments up to four degrees. The lightly cambered leading edge and wide selection of bounce options assures consistent contact in both hard and soft turf conditions. The X95 is KZG's first wedge to feature a medallion piece, and beautifully complements the popular OC-II and HSS Irons. The single notched sole allows the player to open and close the clubface without altering the bounce. The X95 grooves are "U" shaped, thus creating higher spin rates ideal for mid-to-high handicappers looking for increased accuracy. The X95 wedges are available in various lofts for both left- and right-handed players. Only available in a mirror finish. www.kzg.com
