

It took me a long time to take my 3 & 4-iron out of my bag and replace them with hybrid irons. Since then I have become a huge fan and the new Cobra Baffler RailH. Golf manufactures continue to improve year after year, and Cobra has done it once again improving on the #1 selling hybrids in the game. The confidence I now have standing over a 200-215 yard shot is the difference between a birdie putt or a bogie putt. I know if I miss-hit the Baffler RailH hybrid, I will still be in great shape. Cobra has expanded the sweet zone so I can still get great distance across the club face. Most manufacturers are now making clubs sets 4-gw to allow for hybrids. Cobra has made the Baffler RailH hybrid in lofts to replace your 2-6 irons. Get the confidence back in your game with Cobra! To see all the technical specs of the Baffler RailH visit www.cobragolf.com.

A while back I told you about KZG. Well KZG has a new driver they call the KZG PTI Driver. The PTI stands for performance through innovation. This is a club designed for mid-to- high handicappers. KZG is distributed through custom club fitters, and the PTI Driver allows for maximum customization. Two screw portals allow your club builder to alter the trajectory, swing weight and center of gravity. A simple alteration of this club could change the trajectory up to 10 degrees. The sleek all-black finish and design of the head makes this club functional and stylish. To find a custom club fitter for the KZG PTI driver, enter your State or Zip Code at www.kzg.com.
