Low-Handicappers

Low-handicappers have to watch for subtle tweaks, like a less-closed (or even open) face angle, a neutral weight bias and a CG that's not too deep or too low. Consider these:

TaylorMade r7 quad 425 TP: Open face angle, cool Fujikura REAX shaft and the No. 1 driver on tour (\$800).

Titleist 905T: Classic shape with CG in a more centered position (\$400). Bigger 905R is coming.

KZG Gemini 460: Dual face design is aimed at improving stability; a favorite with clubmakers (\$375).

Nike SasQuatch Tour: Compact version has taller face, lower flight and Diamana shaft (\$530).
